

Pearson students data:

Insights

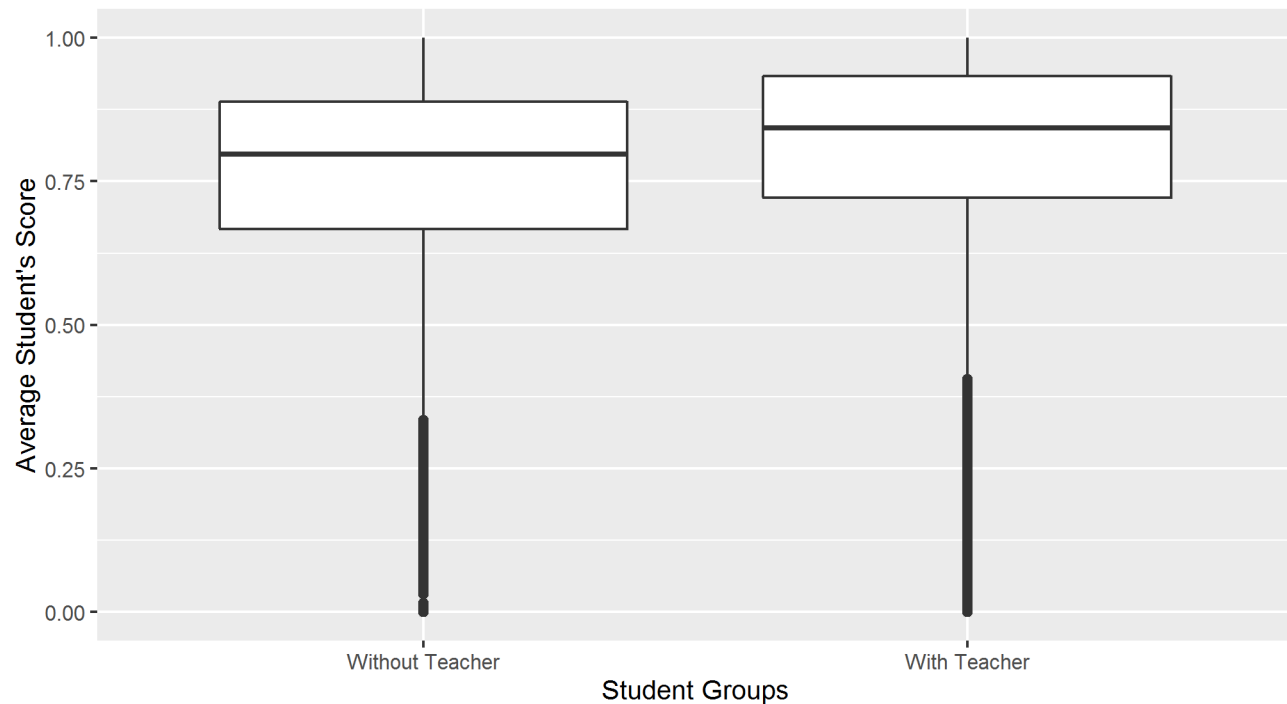

Poznań, 20th of October, 2016

Some units require improvements

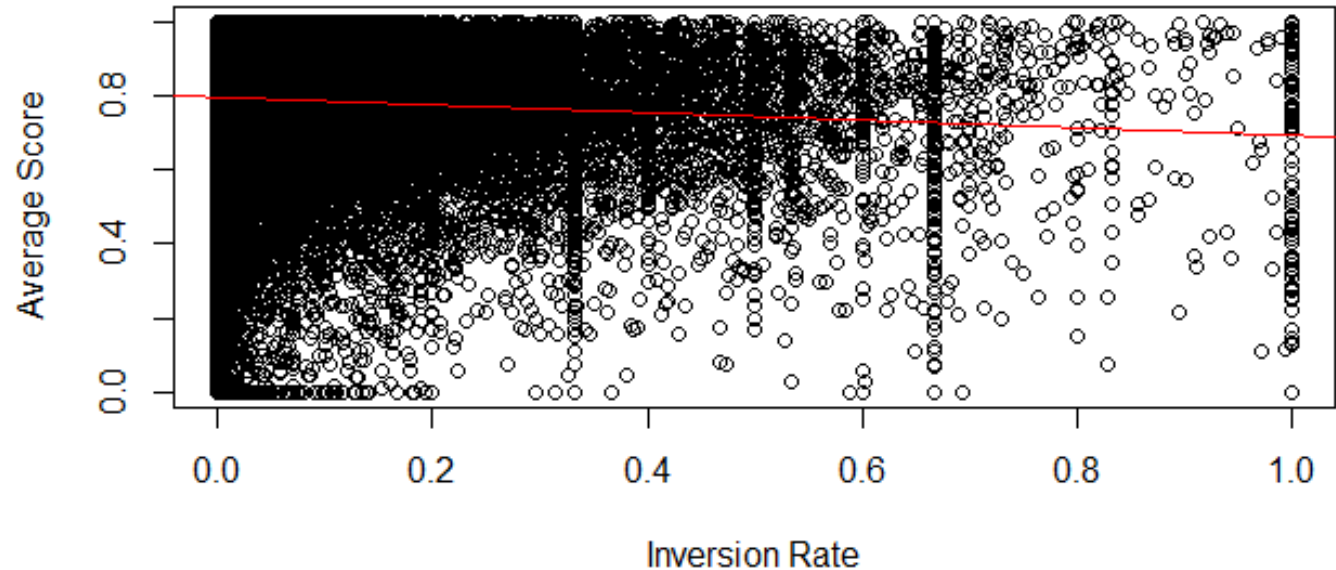

UNITS 2, 3, 4 and **REVIEW 4** require special attention. Much less students start and complete them in comparison to other units.

Teachers can improve student's scores

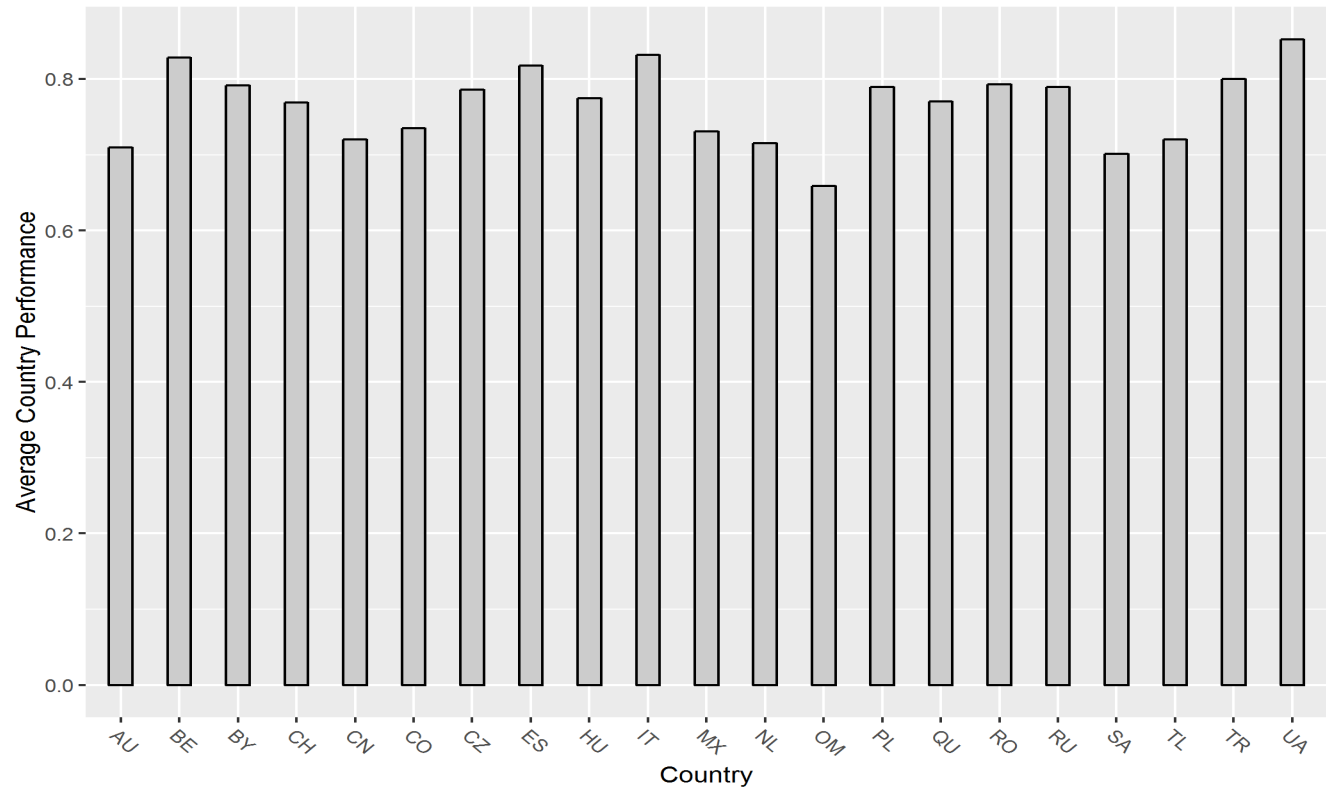

Average tutored student have mean score 0.04 higher than untutored student.

The higher inversion rate, the lower the scores

Reversing order of learning has negative impact on students' score.

Some countries are better than the other

Perhaps cultural differences should be considered when designing learning materials.
